- BS5852 source 0,1 / FAR 25853 B – BULLETIN 117 California Test

Product Description

Article with a modern “MADAGASCAR WASHED EFFECT” which highlights all the natural characteristics of the leather: wrinkles, scratches, insect bites and veins, which become the peculiarity of the article. These characteristics must be considered (and accepted) as signs of naturalness and not as defects.

This particular effect is made handly on every single skin, making it unique and unrepeatabe. It's therefore absolutely normal to find differences in color on the same skin and/or from one skin to another.
